-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 55 and 56 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 55, the last paragraph is worded awkwardly. It is not clear as to what is being claimed. The claim will be interpreted as best understood.

In claim 50, the distance between the collar and the coils is not constant; a definite measurement cannot be made as to determine the measurement of the coils to the distributions channels.

Claim Rejections - 35 USC § 102 /Claim Rejections - 35 USC § 103

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3732

5. Claim 55 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Determan.

Determan discloses an electronically controlled valve comprising:

- A distribution channel 34;
- Several other channels;
- A piston 18;
- Intermediate elements 158;
- Collars 92, 94;
- Several distribution sections;
- A sealing partition (the sealing elements around 162);
- The collars act as sealing elements; and
- Two coils in the distribution channel in the vicinity of further channels 78, 78;

6. Claim 56 is rejected under 35 U.S.C. 103(a) as being unpatentable over Determan.

The relative distances between the coils are a matter of design choice. It would have been obvious to one having ordinary skill in the art at the time of the invention was made to make the spacing as claimed, since it is held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schmidt, Mesenich, Campagnuolo, Sanders, Levitan et al., and Wunder disclose relevant art to the instant application.
